

Designed by Capital Pilot on the back of its proven Investability Rating system, the Boost Fund is the quickest and simplest route to equity funding in the world of early-stage investment.

No meetings, no complex term sheets;
no nonsense.

Accessible to all;
equal opportunity for all.

A £50,000 investment in your big idea is a big deal.

The first fund plans to make fixed £50,000 investments in 100 startups in six months - high speed and high volume.

Application for the Boost Fund is simple and quick. To apply, simply sign up for a Capital Pilot Investability Rating, and if your rating is high enough you'll qualify automatically for funding, subject to a quick online due diligence process.

A 2.5% funding fee (£1,250) is payable on the £50,000 investment. You digitally sign a short-form subscription agreement which is non-negotiable to maximise efficiency and minimise costs. As soon as the agreement is signed, funds are transferred to your company's bank account.

Benefits

Immediate access to cash to fund your business while you complete the rest of your fundraising.

Strongest possible validation of your attractiveness to investors - a high rating and your first investment in the bank via our quick application process.

24-page assessment report with clear guidance on how to improve your investability - whether or not you qualify for the Boost Fund.

Access to our network of co-investors to help secure the balance of your fundraising (subject to success fee).

Use of our media pack and Founder resources to improve your visibility.

Participation in a cohort of Boost Fund startups to learn and grow together.
