Job Description

Job Title: Software Developer (Full time)
Company: The Choral Hub Ltd
Location: Remote

The Company
The Choral Hub is a platform on a mission to make music education accessible to everyone. We've recently launched a gaming app into private beta called *tchzant*, which teaches adults how to sing through active learning and gamification. This sits alongside a bigger ecosystem of support for our community through virtual events and more. We are currently a team of 6, and looking to expand as we sprint toward our public beta launch. Our company values are: to act with Compassion & Integrity to better support our Community; to be both Innovative & Accountable; and to be and encourage others to be Diverse & Passionate.

The Role
You will be working with the core development team to help accelerate the product's growth. You will be joining an open minded and agile team that enjoys the fast paced nature and excitement of a startup business.

Responsibilities
- To work with key stakeholders to build out the product suite
- To produce clean and well written code
- To follow good coding practises including TDD and CI/CD
- To learn and grow with the business

Requirements
- Experience building mobile applications using Swift for iOS
- Python scripting skills for backend development
- Experience with Git and GitHub

Desirable
- Experience with Firebase and GCP
- Knowledge of cross platform mobile development (Flutter, React Native)
- Experience using Swift, Audio Toolbox or Audio Kit
- 1-3 years of startup or freelance development experience

If you are interested please submit a letter of interest to xann@thechoralhub.com outlining:

- Your interest in the role and the company
- Your background and why you think you'd be a good fit for the team
- And how are you using your skills to make the world a better place?
